25X1C

[redacted] has reported that the Votkinsk Arms Machine and Steel Plant 235 produces SCUD missiles. 1/ Examination of this plant on available KEYHOLE photography can neither confirm nor deny this allegation, but shows it to be a large light-fabrication plant probably suited to such production.

The plant is located in the center of the town and covers an area approximately 1 by 1/4 nm. It contains approximately 10 major buildings which are largely light-fabrication buildings and approximately 20 support buildings. A rail-served shipping and receiving yard is located at the north end of the plant.

The town is linked by rail to Izhevsk, 30 nm to the southwest, where missile components are produced. 2/ 25X1A
